CAREER SUMMARY

I am a Learning Designer and Manager with 20+ years of experience in strategizing, designing and developing learning program and training teams. I deeply enjoy crafting creative learning experiences to work around constraints to delight clients.

- In the present part-time roles, I work with organizations that focus on integrating and incorporating VR (through fully immersive campuses) and AI (through scenarios generated with the help of AI using free text responses via an LLM-based chatbot) in training
- In the most recent full-time role in Accenture, partnered with the Cloud Technology team to upskill the entire Cloud team (500+ professionals) in Cloud frameworks and processes
- Learning manager with a proven capability to cut through ambiguity and noise to distil the essence of clients' needs and learning requirements
- Creative and pragmatic designer with extensive experience in proposing designs that translate the requirements and vision of clients to reality using the right mix of tools that optimize cost, timelines and staffing
- Program and project manager who has successfully led multiple teams (internal, clients, and vendors) from the pre-design phase through to delivery
- Strong communicator with the ability to build collaborative relationships with clients, stakeholders, HR partners, and Subject Matter Experts (SMEs)
- Learning experience designer with experience in developing a variety of learning product types including immersive case-based classroom workshops, blended learning, onboarding programs, online training, application simulation, and virtual instructor-led training.
- Hands-on designer skilled in Articulate Rise and Storyline, Lectora, as well as AI video generation tools like Synthesia and HeyGen
- LMS administrator (Matrix, Desire2Learn, TalentLMS) working to develop data-driven insights using analytics derived from the LMS, VR headset and other tools in place.
